Odin to Divest Non-Core Gold Asset

Odin Metals Limited (ASX: ODM) ("Odin" or "Company") has signed a binding Heads of Agreement to transfer the remaining 30% ownership of the prospective and mineralised tenement M27/263 to 70% joint venture ("JV") partner Moho Resources Limited¹ ("Moho") (ASX:MOH).

Termination of the JV allows Odin to focus on its core business in Brazil, and likewise Moho the freedom to operate at 100% on the Sampson Dam prospect, particularly in expediting drill programmes and advancing into future study phases.

The key terms of the acquisition (subject to Moho shareholder approval) are as follows:

- Moho to pay Odin \$120,000 in cash within 30 days of signing,
- Odin to be issued 4,500,000 fully paid ordinary shares in Moho at a deemed issue price of \$0.065 per share, and
- Moho to grant Odin a net smelter royalty of 0.5% on minerals, mineral products and concentrates, produced and sold from the tenement.

Commenting on the acquisition, CEO Simon Mottram said, "Odin looks forward to continuing to support Moho through its registry and is satisfied that conversion of its interest allows both parties the freedom and focus needed to best benefit shareholder value. Further, becoming a shareholder in Moho gives Odin exposure to the whole of Moho's Silver Swan North project."

ABOUT ODIN

- Proven Brazilian mining team
- Exposure to the high-grade Monte Azul Zn deposit. Ideally located close to all necessary infrastructure including other operating zinc mines and a smelter in the same state
- Remains open at depth and along strike, sitting within a 40km long underexplored regional belt with Zn targets
- Leverage to recovery in the Zinc price and global economies

Drilling commenced at Monte Azul, Brazil
